# SAJAD ATHARYAN

Front End Developer

+98 911 490 9575 | sajadath1@gmail.com | Sajadath.ir | Tehran

## SKILLS

**React Next Js**

HTML - JavaScript - TypeScript
React Query - Axios
Redux - Zustand - Zod
Jira - Git - Version Control
Framer Motion

**CSS**

Tailwind - Responsive Design - React Component Libraries such as antd, shadcn etc.

## EXPERIENCE

### Frontend Developer
11/2024 - Present

**Customic** — Tehran

- Designed and developed responsive web applications using modern technologies including Next.js, React, and TypeScript to deliver smooth and engaging user experiences.
- Built reusable and scalable components to improve development efficiency and maintainability.
- Implemented application architecture using Next.js and React, leveraging rendering strategies such as SSR, CSR, ISR, and SSG.
- Collaborated closely with the UI/UX design team to accurately translate designs into functional, user-friendly interfaces.
- Debugged and optimized existing codebases to enhance performance and overall user experience.
- Managed complex application state using Zustand.
- Worked closely with the backend team in an agile team to integrate RESTful APIs on the frontend using Axios.

### Frontend Developer
06/2024 - 11/2024

**Sadrtell** — Tehran

- Refactored the existing platform from WordPress to a custom CMS, including dashboard, e-commerce, and related modules.
- Designed and implemented responsive user interfaces using React and Next.js.
- Developed reusable, modular components to improve scalability and maintainability.
- Built user-friendly UI components using Tailwind CSS.
- Collaborated closely with the design team to understand and implement UI/UX designs from Figma.
- Managed complex application state using Zustand, resulting in improved performance and cleaner state management.
- Worked with backend teams to integrate APIs and ensure seamless interaction between frontend and backend systems.
- Optimized web performance using lazy loading and code splitting, reducing page load time by up to 30%.
- Developed modular, responsive components for scalable web applications.

### Junior Frontend Developer
10/2023 - 04/2024

**FlowChat** — Tehran

- Designed and implemented a responsive user interface for a chatbot application using React, TypeScript, and Tailwind CSS.
- Developed dynamic and reusable components based on Atomic Design principles.
- Managed client-side routing with React Router to deliver a smooth and fast user experience.
- Implemented secure and optimized communication with the backend using Axios, along with data validation using Zod to ensure type-safe data handling.
- Improved application performance and reduced load times through code splitting techniques.
- Collaborated in a team environment using Git and GitHub, including pull requests, code reviews, and conflict resolution.
- Applied UX best practices to simplify interactions and enhance usability for end users of the chatbot.

## SUMMARY

**Frontend Developer** specializing in building **high-performance, scalable, and user-focused web applications** with **React, Next.js, TypeScript, and JavaScript**. Expert in modern rendering strategies (**SSR, SSG, ISR, CSR**) to maximize performance and SEO. Strong background in **API integration**, **state management (Zustand)**, and **Tailwind CSS** for clean, maintainable UI. Proven collaborator in cross-functional teams, delivering **robust, production-ready frontend solutions** while continuously pushing modern web standards.

## PROJECTS

### Vidans

Developed the frontend using **Next.js and TypeScript**.

Responsible for **pixel-perfect implementation** of user interface pages for the **Vidans** platform.

Implemented **smooth and interactive animations** using **Framer Motion**.

Built a fully **responsive UI** using **Tailwind CSS** and **Ant Design**.

Managed data fetching and application state using **React Query** and **Redux** to ensure fast, scalable, and maintainable performance.

Delivered a **modern, high-quality interface** with a smooth and engaging user experience for platform users.
